### NENA CHRIE Federation

#### 💡 Learning Reimagined with Lego Serious Play (LSP) 🧱 ✨

##### **Energized by:**

Dr. Michael Tews, Associate Professor, and Ms. Sydney Pons, PhD Candidate  
Penn State School of Hospitality Management, Pennsylvania State University

In our efforts to make learning more engaging and interactive, we've found that innovative methods can truly transform the classroom experience. One such method that's become a favorite in our teaching toolkit is [Lego Serious Play \(LSP\)](#). Students take an active role in their learning by using LEGO bricks to build models that represent ideas and concepts. This hands-on, collaborative approach encourages problem-solving, critical thinking, and creative expression, all while making complex ideas more tangible. Through LSP, we can guide students not only to understand but also to visualize abstract concepts, turning traditional lessons into dynamic, engaging experiences.

What we've found particularly powerful about LSP is how it fosters inclusivity and boosts participation. In our diverse classrooms, where students may struggle to express themselves in traditional ways, LSP offers an alternative form of communication through the physical act of building. It allows all students—regardless of background or learning ability—to contribute and collaborate in a meaningful way. By creating a space where creativity and teamwork are prioritized, LSP helps our students develop stronger connections with the material and with each other, making learning both fun and deeply impactful. 🙌 Visit [Lego Serious Play \(LSP\)](#) 🧱 to learn more! 🚀
